

Proxima Pro AV 9310 Projector

Among the brightest projector in its class, the Proxima Pro AV 9310 now gives you a better way to equip your boardroom, auditorium, training center, or meeting facility with the latest multimedia display capability. This projector excels in large environments and diverse situations, which demand installation flexibility, wide computer compatibility, and many input options. The Proxima Pro AV 9310 shows bright, detailed images in vivid color. It supports true XGA 1024x768 resolution, and is compatible with a wide variety of workstations. Integrated video line doubling and superb scaling means exceptional video quality. Fit-to-View resizing technology means your audience won't have to squint at the fine print; even the smallest text appears crisp and clean, and images fill the screen. The motorized zoom lens features a 1.8-2.8: 1 (projection image/image width) ratio so the Pro AV 9310 can project distances of 3.6 to 70.8 feet from the screen.

This is a very bright full-size projector. It comes with VGA and video cables, and a power cord. 1-year warranty.

Our price \$1,495
