

Ultima 65 Laminator

The Ultima 65 is the best selling laminator for the school market. Capable of laminating up to 27" wide projects, this laminator is perfect for laminating posters, maps, banners, artwork and more.

The laminator has heated roller design which applies heat and pressure simultaneously for consistent, wrinkle-free lamination. Keypad design allows you to laminate 1.5 or 3 mil laminating film from a push of a button. Loaded with safety features, the Ultima 65 automatically shuts off when not in use over 4 hours. Safety shield covers the heated rollers and the machine will not operate unless the shield is engaged. The Safety Tray interlock on the feed tray will not allow the unit to operate unless the tray is in place. Built-in retractable sliding trim blade cuts the laminating cleanly and safely. It is designed for easy film loading and wrap-free laminating. The Ultima 65 is built for trouble-free high-quality laminating.
