Sharp NotevisionC20 (PG-C20XU) Projector

Sharp has packed a lot of user-friendly features into the C20XU's small, compact frame. Imagine a Notevision projector that has all of Sharp's technology, yet only weighs 5.7 pounds. Take it on the road for mobile presentations. It's light enough to put in a carry bag alongside a laptop computer and it works brilliantly in any number of situations, because its 1000 ANSI Lumens command attention. When engineering the Notevision C20XU, Sharp kept compatibility in the forefront of its design. You'll easily connect to any of the most popular signals: television, video, S-video, and DVD - not to mention desktop and laptop computers. Sharp has also created the Notevision C20XU to retain the millions of colors that comprise today's high-resolution digital images. It has a native resolution of 1024 x 768 (XGA), and Sharp's exclusive ImageACE Resizing technology will automatically adjust images to fill your screen - including 1280 x 1024 presentations.

We have an open-box projector that is still in the factory packaging. It is complete with all factory accessories, including; soft case, remote, all cables, manual, and more. We can't sell it as new, but you won't be able to tell the difference. 1-year warranty.

Our price \$1,495 (compare at \$1,699 for re-furbished, to \$3,299)

InFocus LP350 Projector

The InFocus LP350 is the personal projector that packs all the features of a premium conference room projector into a portable 6.7 pound package. Offering true XGA resolution with 1300 lumens of brightness and outstanding image quality, it's the brightest little powerhouse money can buy. And with DVI digital and analog connectivity with USB, it's ready for the technology of today and tomorrow. This ultra-portable unit is ideal for demanding presentation requirements, and easily shared among group members. The LP350 is an excellent choice for ceiling mounting in a conference room, where presenters frequently rely on richly detailed images - such as financial spreadsheets or drawings - to convey vital business information. With the LP350, companies can standardize on best-selling InFocus projectors in every setting, from road warrior's sales pitches to conference room strategy sessions.

This is a very clean demo projector. It comes with a soft carrying case, remote, all necessary cables, manual, and software. 1-year warranty.

Our price \$1,195

NEC MultiSync MT1045 Projector

Delivering 2000 ANSI lumens and up to a 1280 x 1024 resolution, the MultiSync MT 1045 projector is designed for portable and conference room applications requiring superior display performance. Traveling presenters must succeed in unfamiliar rooms and unpredictable lighting conditions. A bright projector excels in classrooms, where ambient light varies and instructors and students need the ceiling lights to read text and take notes. The MT1045's LCD panels resist dust build-up for clearer images over time. Plus, a new lamp technology enables higher brightness and whiter whites with lower wattage and power consumption. Achieving resolutions from VGA to SXGA, the MultiSync MT1045 portrays complex graphics, such as CAD/CAM drawings. In addition, the MT1045 employs NEC's exclusive AccuBlend technology, which blends pixels so that low and high-resolution images are rendered accurately. Accublend technology and keystone correction together eliminate the distortion created by less than perfect projection angels.

This is a very bright demo projector. It includes VGA and video cables, and a power cord. 90-day warranty.

Our price \$995

Sanyo PLC-9000NA Projector

Among the brightest projector in its class, the Sanyo PLC-9000NA now gives you a better way to equip your boardroom, auditorium, training center, or meeting facility with the latest multimedia display capability. This projector excels in large environments and diverse situations, which demand installation flexibility, wide computer compatibility, and many input options. The PLC-9000NA shows bright, detailed images in vivid color. It supports true XGA 1024x768 resolution, and is compatible with a wide variety of workstations. Integrated video line doubling and superb scaling means exceptional video quality. Fit-to-View resizing technology means your audience won't have to squint at the fine print; even the smallest text appears crisp and clean, and images fill the screen. The motorized zoom lens features a 1.8-2.8: 1 (projection image/image width) ratio so the PLC-9000NA can project distances of 3.6 to 70.8 feet from the screen.

This is a very bright full-size projector. It comes with VGA and video cables, and a power cord. 1-year warranty.
